JOURNAL OF ENGINEERING FOR POWER

Volume 83, 1961

The Journal of Engineering for Power for 1961 was issued quarterly in January, April, July, and October.

Issue	Page Numbers
January	1–144
April	145–218
July	219–330
October	331–474

A

Acid Cleaning. *See* Boilers, Scale Removal, Steam Superheaters

Acoustics
Acoustic attenuation and relaxation phenomena in steam at high temperature and pressure 137

Aerodynamics. *See* Compressors

Airplane Engines. *See also* Compressors
Design and development of a convective air-cooled turbine and test facility 9

Anderson, J. H.
Recent improvements in load capacity of large-steam-turbine thrust bearings (D) 135

Aronson, David
Optimizing a regenerative steam-turbine cycle (D) 440

Arnow, Samuel E.
Optimizing a regenerative steam-turbine cycle (D) 440

Ashton, William F.
Acid cleaning of superheaters and reheaters 363

Avery, C. L.
Experiences with hydraulic prime mover controls (D) 192
Field adjustment of hydraulic-turbine governors 61
New runaway speed limiter for Kaplan turbines (D) 28
Simplified instrumentation and field checking of hydraulic turbine governors (D) 52

B

Bahr, H. C.
Recent improvements in load capacity of large-steam-turbine thrust bearings 130

Baldo, F.
Optimizing a regenerative steam-turbine cycle 433

Bary, Constantine W.
Decentralized peak-shaving—its economic significance to electric utilities ... 119

Bearings
Recent improvements in load capacity of large-steam-turbine thrust bearings 130

Berg, Milton S.
Thermal instability in high-speed gearing (D) 103

Blades. *See* Compressors

Blowers
Dissimilarity laws in centrifugal pumps and blowers 381
Inlet guide vane performance of centrifugal blowers 371

Boiler Corrosion
Corrosion of superheaters and reheaters of pulverized-coal-fired boilers, II 468
Role of chemical thermodynamics in analyzing gas-side problems in boilers 451
Study of sulfur reactions in furnace deposits 444

Boiler Furnaces
Study of sulfur reactions in furnace deposits 444

Boilers
Evaluation of steam washers in power-plant boilers 343
German development in acid cleaning of high-pressure boilers 354

Boll, R. H.
Role of chemical thermodynamics in analyzing gas-side problems in boilers 451

Borgese, D.
Optimizing a regenerative steam-turbine cycle 433

Boron, J. F.
Thermal instability in high-speed gearing 91

Boxer, E.
Résumé of compressor research at the NACA Langley Laboratory 269

Brower, Elayne M.
Natural convection flow in liquid-metal mobile-fuel nuclear reactors 170

Brown, W. W.
Decentralized peak-shaving—its economic significance to electric utilities (D) 125

Brownell, B. B.
Decentralized peak-shaving—its economic significance to electric utilities (D) 125

Brune, C. E.
Design of suction piping and deaerator storage capacity to protect feed pumps (D) 71

Bullock, R. O.
Critical high lights in the development of the transonic compressor 243

Burns, W. J.
Decentralized peak-shaving—its economic significance to electric utilities (D) 126

Burrier, Horace E.
Selection of the hydraulic turbines for the Mammoth Pool Project 177

C

Cain, Carl, Jr.
Corrosion of superheaters and reheaters of pulverized-coal-fired boilers, II 468

Cavitation
Cavitation in centrifugal pumps with liquids other than water 79

Chiantore, G.
Optimizing a regenerative steam-turbine cycle 433

Cleaning. *See* Boilers, Scale Removal, Steam Superheaters

Coal Ash
Corrosion of superheaters and reheaters of pulverized-coal-fired boilers, II 468

Cobine, J. D.
Significance of the Hall effect for three MHD generator configurations 392

Combes, G.
Charts for determining size of surge suppressors for pump-discharge lines (D) .. 45

Compressors
Aerodynamic design and performance of five-stage transonic axial-flow compressor 303
Bibliography 230, 267, 284
Critical high lights in the development of the transonic compressor 243
J83 seven-stage transonic compressor 291
Practical method of predicting transonic-compressor performance 322
Résumé of compressor research at the NACA Langley Laboratory 269
Résumé of transonic-compressor research at NACA Lewis Laboratory 219
Review of supersonic compressor development 258
Shock losses in transonic compressor blade rows 235
Some investigations into transonic axial-flow compressors with high stage load coefficients and low degrees of reaction 286

Concordia, C.
Field adjustment of hydraulic-turbine governors (D) 65
Field testing and adjusting of hydraulic turbine-generator to improve system regulation (D) 59

Condensers. *See* Steam Condensers

Control. *See* Governors

Cooling Systems
Design and development of a convective air-cooled turbine and test facility 9

Cooling Towers
Cooling tower fan performance 155

Coulter, E. E.
Evaluation of steam washers in power-plant boilers (D) 350

Cruise, John
Optimizing a regenerative steam-turbine cycle (D) 440

D

Deaerators. *See* Power Plants—Steam

DeCorso, S. M.
Experiments with MHD power generation 397

deMello, F. P.
Field testing and adjusting of hydraulic turbine-generator to improve system regulation (D) 53

Diesel Engines
Diagram for conversion of diesel engine outputs for changed atmospheric conditions 214
Supercharging of a large two-cycle, loop-scavenged diesel engine 206

Duff, J. H.
Vacuum deaerator design (D) 336

Dupont, J. P.
New runaway speed limiter for Kaplan turbines (D) 29

E

Eden, D. D.
Acoustic attenuation and relaxation phenomena in steam at high temperature and pressure 137

Erwin, J. R.
Résumé of compressor research at the NACA Langley Laboratory 269

Esgar, Jack B.
Design and development of a convective air-cooled turbine and test facility (D) .. 17

Estcourt, V. F.
Application of the deviation concept of turbine cycle monitoring (D) 430
Power-plant performance monitoring (D) 421

Eyden, Bernard
New runaway speed limiter for Kaplan turbines (D) 30

F

Fans
Cooling tower fan performance 155

Fiala, Anthony, Jr.
Optimizing a regenerative steam-turbine cycle (D) 442

Flow of Fluids. *See also* Compressors, Supersonic Flow
Critical and two-phase flow of steam 145
Natural convection flow in liquid-metal mobile-fuel nuclear reactors 170

Fluid Mechanics
Fluid mechanics approach to the labyrinth seal leakage problem 161

Fluid Meters
Effects of brine dispersion in the Allen salt-velocity method 194

Fly Ash
Study of sulfur reactions in furnace deposits 444

Forman, George W.
Cooling tower fan performance 155

France, Howard B.
Vacuum deaerator design (D) 336

(D) denotes Discussion of a paper.

FRANCK, C. C., SR.
Optimizing a regenerative steam-turbine cycle (D) 442

G

GAS TURBINES
Radial turbine, for low specific speeds and low velocity factors 1
GASES. *See also* BOILER CORROSION
GAY, FRAZER, W.
Decentralized peak-shaving—its economic significance to electric utilities (D) 127
GEARS
Thermal instability in high-speed gearing. 91
GILMAN, FREDERICK C.
Résumé of transonic-compressor research at NACA Lewis Laboratory (D) 232
GIRAUD, HENRI
New runaway speed limiter for Kaplan turbine (D) 29
GOLDBERG, S.
Study of sulfur reactions in furnace deposits 444
GOVERNORS
Experiences with hydraulic prime mover controls 189
Field adjustment of hydraulic-turbine governors 61
Field testing and adjusting of hydraulic turbine-generator to improve system regulation 53
New runaway speed limiter for Kaplan turbines 19
Simplified instrumentation and field checking of hydraulic turbine governors 48
GRAPHICAL METHODS
Diagram for conversion of diesel engine outputs for changed atmospheric conditions 214
GURNEY, WM. B.
Vacuum deaerator design (D) 337

H

HALL EFFECT. *See* MAGNETOHYDRODYNAMICS
HAMMITT, FREDERICK G.
Natural convection flow in liquid-metal mobile-fuel nuclear reactors 170
HANSEN, SOREN
Diagram for conversion of diesel engine outputs for changed atmospheric conditions 214
HARRIS, L. P.
Significance of the Hall effect for three MHD generator configurations 392
HARTMANN, MELVIN J.
Shock losses in transonic compressor blade rows 235
HAUGHTON, C. B., JR.
Design and development of a convective air-cooled turbine and test facility (D) .. 17
HEFNER, B. H.
Decentralized peak-shaving—its economic significance to electric utilities (D) 125
HEITMANN, H. G.
German development in acid cleaning of high-pressure boilers 354
HENDRIX, L. L.
Cavitation in centrifugal pumps with liquids other than water (D) 89
HENRIKSEN, A. J.
Supercharging of a large two-cycle, loop-scavenged diesel engine 206
HERRAGE, BERNARD S.
Recent improvements in load capacity of large-steam-turbine thrust bearings (D) 135
HESS, WILLIAM B.
Simplified instrumentation and field checking of hydraulic turbine governors (D) 52
HICKEL, ROBERT O.
Design and development of a convective air-cooled turbine and test facility (D) .. 17
HOFFMAN, H. T.
Application of the deviation concept of turbine cycle monitoring 423
HOLMBERG, J. D.
Cooling tower fan performance (D) 159
HOOPER, L. J.
Effects of brine dispersion in the Allen salt-velocity method 194
HOVEY, L. M.
Field adjustment of hydraulic-turbine governors (D) 65

(D) denotes Discussion of a paper.

HUBBARD, CLYDE W.
New runaway speed limiter for Kaplan turbines (D) 30
HUNDSTAD, R. L.
Experiments with MHD power generation 397
HYDRAULIC TURBINES
Centrifugal pumps used as hydraulic turbines 74
Experiences with hydraulic prime mover controls 189
Field adjustment of hydraulic-turbine governors 61
Field testing and adjusting of hydraulic turbine-generator to improve system regulation 53
New runaway speed limiter for Kaplan turbines 19
Reduction of turbine runner vibration and noise 184
Selection of the hydraulic turbines for the Mammoth Pool Project 177
Simplified instrumentation and field checking of hydraulic turbine governors 48
Vibration of water-turbine draft tubes 36

I

INSTRUMENTS—GOVERNOR-TESTING. *See* GOVERNORS
INSTRUMENTS — TURBINE - SUPERVISING. *See* GOVERNORS

J

JACKSON, ROBERT J.
Inlet guide vane performance of centrifugal blowers (D) 378
JOHNSEN, IRVING A.
Résumé of transonic-compressor research as NACA Lewis Laboratory 219
JOHNSON, G. D.
Selection of the hydraulic turbines for the Mammoth Pool Project (D) 182
JOHNSTONE, I. M.
Experiences with hydraulic prime mover controls 189

K

KARASSIK, IGOR J.
Design of suction piping and deaerator storage capacity to protect feed pumps (D) 72
KELLY, NEIL W.
Cooling tower fan performance 155
KEMENY, G. A.
Experiments with MHD power generation 397
KING, J. A.
J83 seven-stage transonic compressor 291
KINGSBURY, A. W.
Vacuum deaerator design 331
KITTREDGE, C. P.
Centrifugal pumps used as hydraulic turbines 74
Charts for determining size of surge suppressors for pump-discharge lines (D) .. 46
KLAPPROTH, J. F.
Review of supersonic compressor development 258
KLEIN, H. A.
Evaluation of steam washers in power-plant boilers 343
KNOERNSCHILD, E. M.
Radial turbine, for low specific speeds and low velocity factors 1
KOVACH, KARL
Aerodynamic design and performance of five-stage transonic axial-flow compressor 303
KOVATS, A.
Dissimilarity laws in centrifugal pumps and blowers (D) 390

L

LEWIS, GEORGE W., JR.
Shock losses in transonic compressor blade rows 235
LEY, R. D.
Field adjustment of hydraulic-turbine governors (D) 66
LIEBLEIN, SEYMOUR
Résumé of transonic-compressor research at NACA Lewis Laboratory 219
LINDSAY, R. B.
Acoustic attenuation and relaxation phenomena in steam at high temperature and pressure 137
LIQUID METALS
Natural convection flow in liquid-metal mobile-fuel nuclear reactors 170
LONG, L. O.
Field adjustment of hydraulic-turbine governors (D) 66
LUNDGREN, CARL W.
Charts for determining size of surge suppressors for pump-discharge lines 43

M

MCDOWELL, C. H.
Thermal instability in high-speed gearing (D) 104
MACNAMEE, W. R.
New runaway speed limiter for Kaplan turbines (D) 30
MAGNETOHYDRODYNAMICS
Experiments with MHD power generation 397
Significance of the Hall effect for three MHD generator configurations 392
MARINE ENGINEERING
Advances in steam turbines for marine propulsion 108
Thermal instability in high-speed gearing 91
MARTIN, GILBERT
New runaway speed limiter for Kaplan turbines (D) 31
METAL TESTING—FATIGUE
Thermal instability in high-speed gearing 91
MILLER, GENEVIEVE R.
Shock losses in transonic compressor blade rows 235
MORRIS, E. B.
Precautions in the use of citric acid for chemical cleaning 367
MURAKAMI, MITSUKIYO
Vibration of water-turbine draft tubes 36

N

NALLE, R. T., JR.
Decentralized peak-shaving—its economic significance to electric utilities (D) 127
NEAT, FRANK U.
Performance of stainless-steel condenser tubes (D) 341
NELSON, WHARTON
Corrosion of superheaters and reheaters of pulverized-coal-fired boilers, II 468
Study of sulfur reactions in furnace deposits (D) 449
NICHOLS, B. R.
Field adjustment of hydraulic-turbine governors (D) 67
New runaway speed limiter for Kaplan turbines (D) 31
Simplified instrumentation and field checking of hydraulic turbine governors (D) 52
NOVAK, R. A.
Résumé of transonic-compressor research at NACA Lewis Laboratory (D) 233

O

ORNING, A. A.
Study of sulfur reactions in furnace deposits 444

P

PATEL, H. C.
Role of chemical thermodynamics in analyzing gas-side problems in boilers 451
PELL, ROBERT H.
Performance of stainless-steel condenser tubes 339
PÉRARD, G.
Charts for determining size of surge suppressors for pump-discharge lines 45
PHILLIPS, E. L.
Vacuum deaerator design 331
PINNES, ROBERT W.
J83 seven-stage transonic compressor (D) 302
POTTER, J. H.
Optimizing a regenerative steam-turbine cycle 433
POWER PLANTS
Decentralized peak-shaving—its economic significance to electric utilities ... 119
POWER PLANTS—HYDROELECTRIC
